

JD for Backend Web Developer

We are looking for a driven and analytical **Backend Web Developer** who would play a key in a fast-growing company operating in a transforming market. As a Backend developer you'll have a significant influence on the company's technical platforms and work with cutting-edge technology to build applications that will be used by thousands of customers.

Responsibilities

- Participate in the entire application lifecycle, focusing on coding and debugging
- Write clean codes to develop functional web applications
- Troubleshoot and debug applications
- Perform UI tests to optimize performance
- Manage cutting-edge technologies to improve legacy applications
- Collaborate with Front-end developers to integrate user-facing elements with server-side logic
- Gather and address technical and design requirements
- Provide training and support to internal teams
- Build reusable code and libraries for future use
- Liaise with developers, designers and system administrators to identify new features
- Follow emerging technologies

Requirements

- Proven work experience as a Back-end developer
- In-depth understanding of the entire web development process (design, development and deployment)
- Hands on experience with programming languages like PHP and Python
- Working knowledge of CMS framework
- Proficient using WordPress, jQuery and MySQL
- Familiarity with front-end languages (e.g. HTML, JavaScript, CSS and Angular js)
- Knowledge on Ionic frame work.
- Excellent analytical and time management skills
- Teamwork skills with a problem-solving attitude
- B.SC or B. Tech Or ecommerce degree or relevant field

Job Location: Vijayawada, A.P.
